

AIAM training activities

The **Italian Association of AgroMeteorology** often organizes training courses, workshops, seminars and other activities on topics of interest to agrometeorologists.

In the last years **AIAM** has expanded its training actions, focusing the attention on agrometeorological modelling and on basic programming.

In particular in February 2010, the **Italian Association of Agrometeorology** and the [Italian Society for Agronomy](#), organised in **Turin**, in collaboration with Piedmont Region, the **first edition** of the training course on

AGROMETEOROLOGICAL AND CROP SYSTEM MODELLING

(see [Announcement in Italian](#)).

Afterwards the **eighth edition** of the training courses on

DATA ANALYSIS AND BASIC PROGRAMMING

(see [Announcement in Italian](#))

took place as usual in **Rome** at the CRA-CMA (Research unit for Climatology and Meteorology applied to Agriculture) centre from **29th of November to the 2nd December 2011**

-

Moreover in April 2012 the **first edition** of the training course

ELEMENTS OF DYNAMIC AND FORECAST METEOROLOGY WITH AGRICULTURAL APPLICATIONS

(see [Announcement in Italian](#))

took place. The course was organized in **Turin** by **AIAM** and the **Italian Meteorological Society** , in partnership with Piedmont Region, ARPA-Piemonte and University of Turin.

All new announcements will be promptly published on this website and communicated through our newsletter.
